

PROTOMATIC
MEDICAL

Manufacturing precision parts from
concept to production

Protomatic Inc. is a leading contract manufacturer of high-precision prototype, CNC machining and assembly. We know that when you select a contract manufacturer for product development assistance, you look to extend your team. At Protomatic, we join your team to create success. We're passionate about delivering products that embody the innovation, quality and excellence that exceed the exacting standards of our customers.

Protomatic supports manufacturing of complex and high-precision components:

- Machining – CNC 3,4, 5-Axis Milling and 2,3-axis Turning
- Materials – plastics, rubbers, ceramics, aluminum, steel, stainless steel, super alloys, titanium, refractory metals
- Special operations – tumbling, glass bead blasting, micro-blasting, polishing, riveting, adhesive assembly.
- Inspection – parts are inspected to ensure specs are met by utilizing a multi-step process including hand gauges, CMMs, optical comparator, Laser Micrometers, Go/No-Go gauges, creating Inspection Sample Warrants for First Article Test compliant with ISO and AS.

Protomatic provides expert technical product design support:

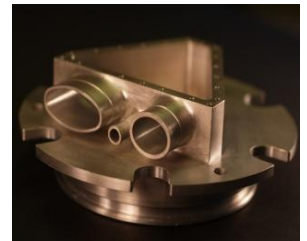

- CAD/CAM – Utilizing Solidworks 2010, we can change your idea to drawing, reverse engineering or provide CAD file. We can enhance your design for optimal-cost manufacturability
- Non-Disclosure Agreements and Confidentiality are standard practice.

Protomatic is your "one stop shop" for turn-key solutions:

- Rapid response to quotes; most quotes back within 24 hrs
- We partner to solve your toughest challenges – innovation, new product development, production, production "emergency"
- Provide or manage secondary operations – Anodize, grind, plate, weld, sandblast, paint, electro-polish, dry film lubricate
- Program management of your job from beginning to end
- We deliver on time and seek out cost reductions

Protomatic's culture rallies around these certifications:

- ISO 9001:2008 Certified QMS
- AS 9100B:2004 Aerospace Compliant
- ISO 13485:2003 Medical Device Compliant

Protomatic helps turn your ideas into reality; your complete "one stop shop" for technical design, complex machining and program management.

***Protomatic is more than customer driven -
We're mission-critical ready!***
