

PROTOMATIC
Life-saving precision.

PROTOMATIC

Life-saving precision.

CNC machining that makes a difference

Protomatic is a leading contract manufacturer of high-precision prototype, short-run machining and assembly. We know that when you select a contract manufacturer for prototype or production, you look to extend the passion of your team. At Protomatic, we join your team to create success. We're passionate about delivering products that embody the innovation, quality and excellence that exceed the exacting standards of our customers.

Protomatic manufactures complex, high-precision components:

- Quality – maintain tolerances better than $\pm .001"$ (.025mm).
- CNC Machining.
 - 2-, 3-, 4-, 5-Axis milling.
- 2-, 3-Axis turning.
- 7-, 8-Axis, multi-axis (mill-turn, milling, Y and sub-spindle).
- 6-Axis robot (CNC material handling).
- Materials – plastics, rubbers, ceramics, aluminum, steel, stainless steel, super alloys, red (copper alloys), titanium, refractory metals (high temp).
- Special operations – laser marking, media tumbling, spinner tumbling, glass bead blasting, micro-blasting, dry and CO2 machining, polishing, riveting, assembly.
- Inspection – parts are inspected to insure specs are met using a multistep process including hand gauges, CMM, optical comparator, vision systems, Go/No-Go gauges, creating Inspection Sample Warrants for First Article Test using AIAG, ISO, MIL and AS methods. Utilizing various sampling methods from 100%, to AQL based MIL-STD-105, MIL-STD-1916, and ANSI/ASQ Z1.4.

Protomatic provides expert technical product support:

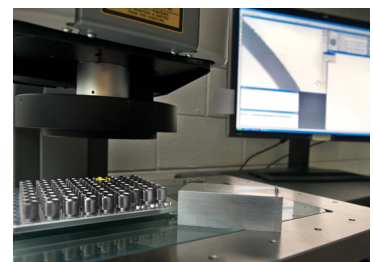

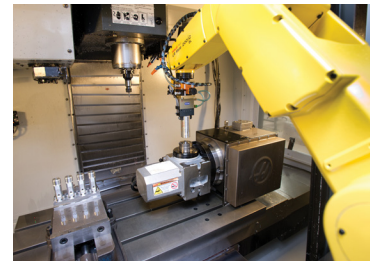

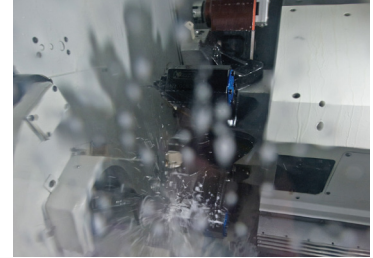

- CAD/CAM – from idea, drawing, reverse engineering or CAD file, we'll enhance your design for optimal-cost manufacturability.
- Non-Disclosure Agreements and confidentiality are standard.

Protomatic is your "one stop shop" for turnkey solutions:

- Rapid response to RFQs – simple quotes in 24 hours.
- We partner to solve your toughest challenges – innovation, new product development, prototype, pre-production, and production.
- Provide or manage secondary operations – anodize, grind, plate, weld, sandblast, paint, electro-polish, dry film lubricate.

Protomatic's culture rallies around these certifications:

ISO 9001:2015 Registered QMS
ISO 13485:2016 Registered QMS
AS9100D Registered QMS
